

Antonio Balestra

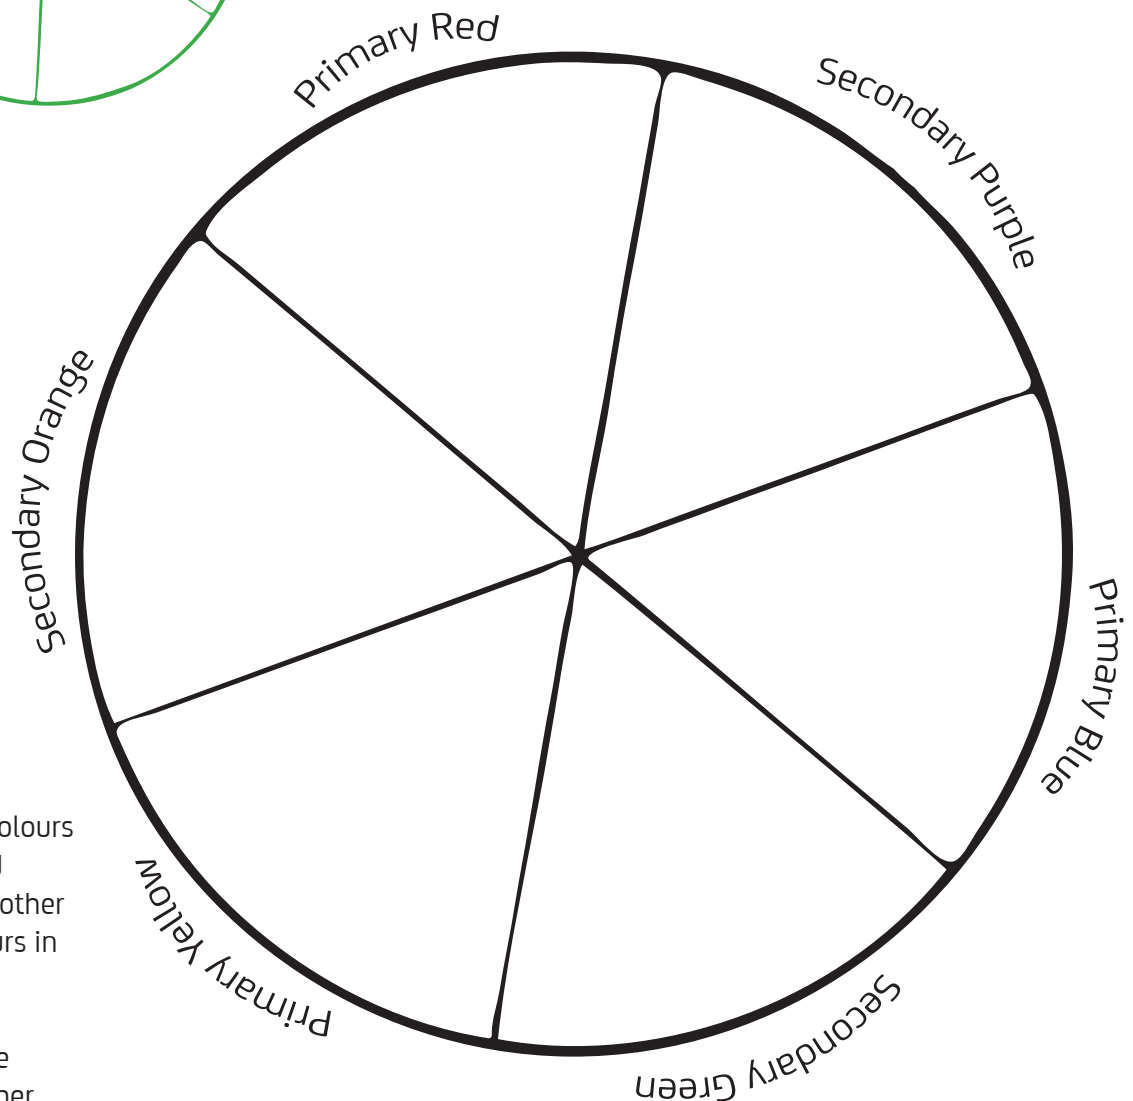

Antonio Balestra was an Italian painter of the Rococo period. You will see his strong use of complementary colours throughout his work.

Colour Theory

The Colour Wheel is a visible way to explain how the 3 primary colours, RED, BLUE and YELLOW, mix to create all the other colours.

Cut out or tear small pieces of coloured paper from magazines, make a pile for each colour, but choose different tones of light/dark and you can include writing or patterns.

Fill each section neatly to the edges to create your own exciting colour wheel below.

Primary Colours are colours that cannot be created through the mixing of other colours. They are colours in their own right.

Secondary Colours are made by mixing together Primary Colours.
